Subject: RE: NW Natural Response to DEQ May 22, 2015 Letter

Good afternoon Bob.

DEQ reviewed NW Natural's July 13, 2015 reply to our May 22, 2015 letter that issues the final comments on the Revised Gasco Site HERA Report (see footnote). The July 13th letter acknowledges that DEQ's final comments amend the report, confirmation of which DEQ appreciates.

In addition, the July 13th letter lets DEQ know that the reference made to monitoring well "MW-41F" in our letter (see comment to "HERA Iso-Concentration Figures, Iso-Concentration Figures"), should be corrected to refer to "MW-41U." DEQ understands that "MW-41F" was not installed in the fill as originally planned. Instead, due to the presence of thin unsaturated fill material at the drilling location, monitoring well "MW-41U" was installed in the upper-most portion of the Alluvium water-bearing zone. DEQ acknowledges and accepts the correction.

The July 13th letter also provides NW Natural's understanding of one of DEQ's final comments regarding the Wetlands Ponds (see comment to "Wetlands Ponds, Section 4.4.4 and Section 4.4.5"). This e-mail confirms that NW Natural's understanding of DEQ's comment is correct.

Bob, thank you for the information provided in NW Natural's July 13th letter. All of us at DEQ involved in the Gasco Site are looking forward to the meeting on July 27th and initiation of the work on the uplands FS.

Please feel free to follow-up with me if you have questions regarding this e-mail.

Dana
